According to the National Center for Health Statistics, seven percent of children ages three to seventeen have been diagnosed with a developmental disorder; this includes autism spectrum disorder, intellectual disability and developmental delay.

Join us to hear Dr. Cowan discuss groundbreaking work on the genetics and atypical brain wiring that may be the culprit in many developmental disorders, including autism!

Christopher Cowan, PhD
Professor and Chair,
Department of Neurosciences
William E. Murray SmartState Endowed Chair
College of Medicine

Science for the rest of us

MUSC’s Science Café is a series of presentations offering entertaining talks on scientific subjects in a fun, non-technical way in a pleasant social environment. To learn more, contact Tara Abbott at 843-792-2926 or abbottt@musc.edu.

AUTISM: A Matter of Genetics and Brain Wiring?

Tuesday, September 17, 2019 | 5:30 pm
