

**Please -
let's talk about suicide.**

Mark S. George, MD

Distinguished University
Professor
College of Medicine
Department of Psychiatry

It is high time that we use modern neuroscience to understand what goes wrong. Dr. Mark George, internationally renowned scientist in depression and brain stimulation treatments, will present evidence that suicide arises from defective circuits in the brain, in a manner akin to other brain diseases like epilepsy or Parkinson's Disease

Science for the rest of us

MUSC's Science Café is a series of presentations offering entertaining talks on scientific subjects in a fun, non-technical way in a pleasant social environment. To learn more, contact Tara Abbott at 843-792-2926 or abbottt@musc.edu.
